KRZYSZTOF KOPCZYNSKI. Call me Kris.

I am an experienced, passionate software developer specialising in customer-facing web and mobile applications in Javascript/Typescript with some exposure to Python and PHP. With over 5 years in the field, I have expertise in creating intuitive interfaces that cater to specific user and client requirements with focus on accessibility and usability. I am proficient in utilising advanced technologies and best practices, including testing and CI/CD, to deliver reliable and robust solutions. My commitment to staying current with industry trends, coupled with strong problem-solving skills, equips me to add significant value to complex software projects.

EXPERIENCE

Estendio
March 2021 - April 2024, Glasgow

Software Developer, Senior Developer (1 year)

I contributed to the development of presentation support software for web and mobile platforms, with a strong focus on accessibility to empower users to deliver more confident and well-prepared presentations.

I worked regularly with various cross-functional teams across the company to understand product requirements and translate them into technical specifications and actionable tasks. I specialize in developing and implementing frontend solutions using React.js, React Native, Typescript, and Next.js to create scalable and robust UI features. My ability to learn, investigate, prototype, and iterate has been instrumental in my work.

As a senior developer, I oversaw the development of a greenfield project on the front-end, collaborating closely with the back-end and interdisciplinary teams. I wrote clean and scalable code and provided technical leadership to a small team of engineers. I was responsible for ensuring the quality and functionality of multiple software solutions.

MoneyDashboard
July 2020 - March 2021, Edinburgh

Junior Web Developer

Worked in a fast-paced Agile environment for an award-winning startup, constantly shipping new user-facing features for a financial management application with React.JS (and React Native).

Collaborated efficiently with the UX design team to ensure an intuitive and user-friendly interface, following best practices and UX principles. Worked closely with back-end developers to integrate front-end components with APIs and other server services.

Refined my skills in developing scalable, testable, and reusable code, while ensuring the technical feasibility of UI/UX designs. My contributions played a significant role in creating a high-quality product that effectively addressed user needs and business objectives.

Freelance Web Developer
2019 - 2022, Edinburgh

Delivered end-to-end commercial, high-quality SPAs with CSS3, HTML5, and various JavaScript frameworks (React.JS, Next.JS, and Meteor.JS) in collaboration with a diverse group of private clients and local businesses.

Built responsive, cross-browser compatible, SEO-friendly, and accessibility compliant websites with enhanced performance, while overseeing the full project life cycle. Produced website mock-ups for clients ensuring quality control and client satisfaction.

EDUCATION

2022 - Present
BSc (Honours) Computing & IT
The Open University, Scotland

TECH STACK

CSS	HTML	React JS	React Native

Next JS	Typscript	Jest	Storybook

Redux	Jotai	TailwindCSS	Sass
